Be prepared for the CRA! The CRACoWi team is preparing a series of events in the upcoming months. Join our CRAcademy workshops or CRA Cluster events, where we'll present the CRACoWi project and the tools we are developing.

Upcoming: CRACoWi Use Case Workshop - Built for SMEs

CRAcademy UC Workshop

Cybersecurity affects us all

INCLUDING SMALL AND MEDIUM-SIZED ENTERPRISES

2 September 2026 11:00 AM CEST

CRACoWi

REGISTER NOW

Co-funded by the European Union

ECCC

If your company doesn't have a dedicated cybersecurity team, this workshop is for you.

Kicking off our new CRAcademy Use Case Workshop series, this first session is designed specifically for **small and medium-sized enterprises** navigating the Cyber Resilience Act (CRA) with limited in-

house resources - a reality for the vast majority of SMEs across Europe.

Hosted with insights from CRACoWi use case partner Erminas, the session moves beyond theory into a realistic, practical scenario: how to handle a cybersecurity incident calmly and confidently, without a large security organisation behind you.

What you'll take away:

- A real-world walkthrough of responding to a vulnerability - scoping affected products with an SBOM, checking patch status, and communicating clearly with customers
- Practical, low-overhead ways to build traceability and structure, without building a full security department
- Why SMEs carry the same CRA responsibilities as large manufacturers and how to meet them realistically, with the resources you actually have

Who this is for:

Founders, engineering leads, and product owners at SMEs developing or maintaining software or connected products - especially those without a dedicated cybersecurity function.

The presenter: Jonas Gerlach - Cybersecurity Team Lead & IIoT Developer with 8 years of hands-on experience designing, implementing, and securing industrial systems. Passionate about bridging operational technology (OT) and information technology (IT), leading technical teams, and delivering secure, scalable IIoT solutions.

Join us!

 **2 September 2026** |  **11:00-12:00 CEST** |  **Online**

October - European Cybersecurity Month

Join Us in Athens for a joint workshop on NIS2 compliance, CRA enforcement, and cross-border cybersecurity incident response

The EU cybersecurity regulatory landscape is evolving fast – and organisations across every sector are being asked to keep pace.

Building Cyber Resilience in the Digital Era is a high-impact workshop organised by the EU-funded projects [CRACoWi](#), [DETANGLE](#), and [INCIDENTRON](#), bringing together policy, practice, and peer projects for a single day of focused, practical exchange.

The event centres on three interconnected themes shaping the future of digital resilience in Europe:

- **NIS2 compliance** – what implementation really looks like in practice
- **Cyber Resilience Act (CRA) enforcement** – what to expect as the regulation takes hold
- **Collaborative, cross-border cybersecurity incident response** – how sectors and countries can work together more effectively when it matters most

This is not a theoretical policy briefing. It's a working session designed to give attendees concrete tools, honest insights from the field, and

direct access to the people building solutions to help organisations comply and stay resilient.

Whether you're leading compliance efforts, shaping strategy, or working on the ground to strengthen your organisation's cyber resilience, this is a chance to learn directly from the projects building Europe's cybersecurity toolkit – and to help shape what comes next.

 **Friday, 2 October 2026**  **09:00 – 16:00**

 **Electra Palace Athens** - 18-20 N. Nikodimou str, Athens, Greece
